95 PHONICS BOOSTER BUNDLE™: SUMMER SCHOOL EDITION

STUDY DESCRIPTION

The 95 Phonics Booster Bundle: Summer School Edition (SSE) includes 25 lessons to quickly address phonics skills covered during the previous school year. The program was studied by LXD Research during Summer 2021 in two districts, one in California and one in Arizona.

Nearly 1,000 students were in the study (479 "SSE" students and 479 statistically similar comparison students "Non-SSE"). Study 1 used SSE one lesson a day over six weeks, while Study 2 intensively used two lessons a day over one month. Both studies used Acadience® Reading K-6 composite scores to assess student outcomes.

SAMPLE DESCRIPTION

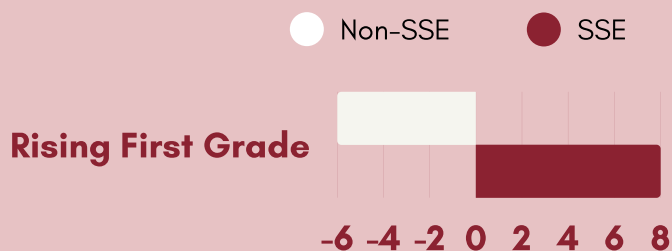

ILLUSTRATIVE QUOTE FROM THE TEACHER SURVEY

"I really like this program and am looking forward to our new phonics set in the fall. I liked that the workbooks had a set of chips for each student...This program had some components that I was not familiar with, like syllable mapping. This was a good addition to the syllable routines that we had used during the school year."

STUDY 1

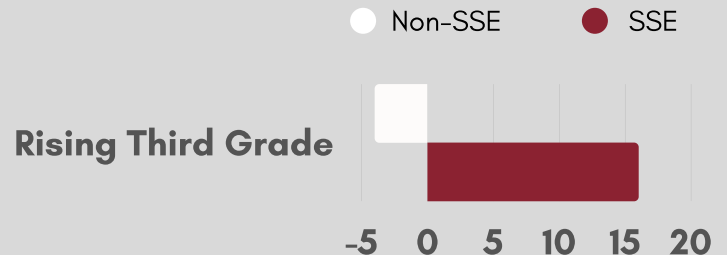

Rising first graders in the **SSE group outperformed** similar students who did not attend summer school on Acadience Reading (8 point gain vs. 6 point slide).

Stats: $t(102) = -2.75, p = .007$

STUDY 2

For rising third graders who were *Well Below Benchmark*, **SSE students outperformed** non-SSE students on Acadience Reading (16 point gain vs. 4 point slide).

Stats: $t(112) = -2.44, p = .016$
