Introduction

Description of 95 Phonics Booster Bundle™: Summer School 2nd Edition (SSE)

The *95 Phonics Booster Bundle™: Summer School 2nd Edition (SSE)* is a phonics strand taught in summer school with the whole class or in small groups. An additional use of the program is to teach part or all of the first 25 days in the fall to jump-start the transition to the next school year. This will help ensure that students have mastered the prior year's skills.

This program is consistent with a core value of 95 Percent Group, which is that reading instruction should be teacher directed. Although digital tools are included, this program is grounded in the belief that the teacher—not a computer—teaches students how to read. The 25 daily lessons in this program are designed to teach for 30–45 minutes daily during summer school or as a review at the beginning of the school year. This program serves as a phonics and word study strand and is not intended to be a comprehensive literacy curriculum; it doesn't include read-alouds, oral language and vocabulary development, reading of authentic text, comprehension instruction, and process writing.

By varying the number of practice opportunities provided to students, teachers can manage the lesson time to 30–45 minutes to fit into a summer school schedule. For example, if less time is available, teachers can dictate 1–2 of the 3 sentences provided in the Write Sentences section or have students complete 1 row of Word Completion with Pictures.

Rationale for Developing the Summer School 2nd Edition

Clients have often asked 95 Percent Group to consider developing a Tier 1 phonics program. Across the company's history, this has been the single most requested new product. The impetus for this request is the large, measurable gains occurring among the students receiving instruction with 95 Percent Group's intervention materials. Having experienced what explicit, systematic, and sequential phonics instruction looks like, clients realize that their core program lacks phonics instruction grounded in the science of reading and the principles of structured literacy. Although a handful of clients have successfully used the intervention routines within their core reading block, most clients have experienced challenges adapting our phonics intervention materials for whole-class use.

Based on client feedback, this program addresses the following needs:

- Inadequate phonics instruction in many popular literacy curricula
- An excessive number of students identified for Tier 2 or 3 phonics intervention
- Inadequate teacher knowledge about the science of reading and effective phonics instruction
- Gaps in students' phonics skill development resulting from school closures, summer breaks, etc.
- A curriculum that enables a seamless transition between in-class and remote learning without disrupting or watering down the instruction
- Digital tools to enhance instruction in any setting

Using the deep phonics expertise of our team as well as leveraging instructional strategies found in our existing phonics products, this new *Summer School 2nd Edition* phonics program was not only developed quickly but also entirely by our educator employees. A hallmark of the curriculum is

that it provides explicit routines in each of the important components of phonics instruction, including word sorting, sound-spelling mapping with and without phonics chips, word chains, and transfer to text. This program aligns with all of 95 Percent Group's phonics assessments and intervention materials so students will have consistent gestures, chip colors, and routines between Tier 1, summer school, and intervention. New decodable text was written so that passages used in our intervention materials will be fresh for students who require extra support in Tier 2 or 3.

Additionally, to address the potential of school closures, the program was designed to ensure a seamless transition to remote learning without disruption in the curriculum sequence by sending the Student Workbook and manipulatives home. These materials can be used from home in unison with the Presentation files when teachers instruct students on videoconferencing platforms.

Elements included in the 95 Phonics Booster Bundle™ Summer School 2nd Edition Rising 1st Grade

Teacher's Package – The Teacher's Package includes 1 full-color, spiral-bound TE for Rising 1st grade. Each TE includes 25 days of lessons. The back cover is a firm stock, enabling teachers to hold the book folded back to see a single page with assurance that it will not bend.

Student Package – The Student Package includes 2 components. First, there is a Student Workbook (SW) of approximately 42 pages with full-color covers and grayscale printing on the interior pages. Everything the student needs to participate in the lesson is contained in the workbook. This includes letters with arrows to review letter formation, pictures for identification of initial sounds, high-frequency word boxes to read and build automaticity, designated areas for writing sentences, and text to practice reading sentences and short stories. The second component is the student letter-sound strips. There are 7 strips (containing 3-4 letters each; 26 letters total) printed on durable cardstock that is pulled out from the center of the SW binding. The letter-sound strips support letter-sound association as students trace each letter with their fingers while saying the letter name, keyword, and sound.

Presentation Files – These HTML animated files contain images to guide instruction of the lessons. Teachers access and use the Presentation files on our website either in the classroom or during remote instruction using a videoconferencing platform such as Zoom or Google® Classroom. Because these files are HTML, they are accessible on any device with a current browser, including a Chromebook®.

Product Training Video – This 30-minute training video provides an overview of the program and tips for teaching the lessons. This video is accessible on the Customer Portal by all teachers who have a Teacher's Package. More extensive professional development is available either virtually or in person for an additional fee.

Other Teacher Support – The product's landing page will be updated with teacher support tips and resources as new questions arise. Teachers should check back frequently for additional resources.
